

LUNG CANCER SCREENING With Low-dose CT Scan

Lung cancer causes more deaths than any other cancer in the US, due to a lack of screening.

Screening is covered by most insurance for long-time smokers age 50-80.

The scan takes only minutes and is totally painless.

Ask your primary care provider about scheduling a lung cancer screening.

SCREENING RECOMMENDED IF:

- Age 50-80 years old
- 20 pack-year history
(example: 1 pack/day for 20 years or 2 packs/day for 10 years)
- Current smoker or quit within the past 15 years.

*Covered by most insurance providers for patients within these guidelines.

CONSULT A PHYSICIAN ABOUT SCREENING IF:

- Age 50+ years old
- 20 pack-year history
(example: 1 pack/day for 20yrs or 2 packs/day for 10yrs)
- Current smoker or quit within the past 15 years
- Contact with radon, asbestos or other cancer-causing agents
- Family or personal history of lung cancer
